The retail sector retail can offer a number of flexible working opportunities which may suit certain individuals in differing ways. Whilst conducting the Gender Pay analysis, the Company found no evidence of where any pay or bonus was paid proportionately higher to any male employee; even discovering that bonus pay was higher in female employees. Analysis further confirmed that bonus pay is awarded on objective achievements only and the number of female employees in Management roles in our stores, is higher than male employees.

James Convenience Retail Limited is committed to promoting itself as an equal opportunity employer and will provide the same level of opportunity to any applicant or employee of the Company; irrespective of any personal characteristics. The Company is continuously working to find ways of improving its Gender Pay statistics.

I declare the above data is accurate as of 5 April 2017.
